MERN Developer intern July 2023
webstack academy

- gained hands-on experience in full-stack development.
- build a food delivery web app using MERN technology.
- implemented authentication and payment features.

Web Development head march 2023-present
programming club , KNIT sultanpur *KNIT, sultanpur*

- helped club in organising coding events.
- Given dedicated time to mentor junior members within the Programming Club

PROJECTS

RoyalCafe This is food ordering and delivering web app with all functionalities made using reactjs , nodejs , expressjs , mongodb. It has all functionalities like signin , signup (secured using jwt) , add to cart , and then payment and track order. (Try it here)

ServiceBridge Developed ServiceBridge, a web app built using ReactJS, NextJS and mongodb, enabling users to easily connect with local service providers such as electricians and AC mechanics. ServiceBridge allows providers to create accounts, manage services, and directly engage with potential clients. (Try it here)

MoviesFlix Built a web scraping project using Cheerio, ReactJS, NodeJS, and ExpressJS. Scraped data and links from an external movie website, created an API, and integrated it into the frontend for seamless data display. (Try it here)

school Database Managed student information with admin control, allowing updates, deletions, and additions. Gained valuable experience in integrating frontend and backend systems and effectively utilizing APIs in frontend development.(Try it here)

CODING PROFILES

- Solved 500+ questions on leetcode
- 3 Star on codechef

ACHIEVEMENTS

- Selected and participated in CODEUTSAVA7.0 at NIT raipur as a team leader
- secured good ranks in college coding contests
